

# The McKenzie Institute International Chiropractic Education Programme

The McKenzie Institute International is pleased to invite Doctors of Chiropractic to take advantage of the McKenzie Institute International Chiropractic Education Programme, a series of weekend courses developed in response to D.C.s whose practices do not permit attendance at courses currently presented over 4-days. The Institute will arrange courses in the McKenzie Method of Mechanical Diagnosis and Therapy for D.C.s at locations throughout the world depending on the level of registrations received.

*"The McKenzie Institute International Chiropractic Education Programme will clinically refresh the Doctor of Chiropractic's perspective on end range loading strategies, including the chiropractic adjustment. The programme affords D.C.s an expanded, evidence based algorithm concerning the source, direction and degree of forces used for movement and positioning as therapy. Add to that the fact that the McKenzie Method provides the symptom profile of the subluxation listing and this is a programme not to be missed!"*

Gary Jacob, DC, MPH, Dip MDT; Chiropractic Consultant to the McKenzie Institute International
